

## Cambridge Testing Situational Action Theory (SAT) Workshop

## 4 - 5 October 2014

The Møller Centre, Churchill College University of Cambridge

## Saturday 4 October

07:30	Breakfast
09:15	Situational Action Theory Chair and moderator: Alfonso Serrano-Maíllo, UNED, Madrid
09:20	Situational Action Theory – an overview of the theory and its key testable implications Per-Olof Wikström, University of Cambridge
09:50	Applying SAT to non-traditional crimes — explaining radicalisation and terrorism  Noemie Bouhana, University College London
10:10	Tests of SAT – a critical review of research undertaken Robert Svensson, Malmö University & Lieven Pauwels, University of Ghent
10:30	Discussion – SAT and its core assumptions
11:00	Coffee break
11:20	Testing the situational model of SAT  Chair and moderator: Kristina-Maria Kanz, University of Muenster
11:25	The complexities of youth violence – an application of the situational model of Situational Action Theory Harald Beier & Clemens Kroneberg, University of Cologne
11:40	Approaches to testing interaction effects in crime surveys – an application of SAT Helmut Hirtenlehner, Johannes Kepler Universität, Linz
11:55	Young people's differential vulnerability to criminogenic exposure Per-Olof Wikström, Richard Mann & Beth Hardie
12:10	Situating the perception-choice process – an application of SAT to embezzlement opportunities Stefanie Eifler, Katholische Universität Eichstätt-Ingolstadt
12:25	Discussion –issues in testing the situational model of SAT
13:00	Lunch

14:00	SAT and the dynamics of change
	Chair and moderator: Klaus Boers, University of Muenster
14:05	Propensity, exposure and acts of crime – a study of within individual change Kyle Treiber & Per-Olof Wikström, University of Cambridge
14:20	Latent growth curve models of crime frequency, propensity and exposure Jost Reinecke, University of Bielefeld
14:40	Discussion – issues in testing SAT in models of human development and change
15:10	Coffee break
15:30	The role of context and selection in SAT
	Chair and moderator: Clemens Kroneberg, University of Cologne
15:35	Gender and Situational Action Theory — an example of the role of demographic 'markers' in the explanation of delinquency Frank Weerman, NSCR, Amsterdam
15:55	Delinquent acts, situations and temptations — a network-based approach of modelling peers' characteristics within SAT Dominik Gerstner & Dietrich Oberwittler, Max Planck Institute for Foreign and International Criminal Law, Freiburg
16:15	Measuring the social environment of small areas Dietrich Oberwittler, Max Planck Institute for Foreign and International Criminal Law, Freiburg
16:35	Situations and selection Ralph Taylor, Temple University & Per-Olof Wikström, University of Cambridge
16:55	Prospects of integrating macro-level theory and SAT – testing SAT across cultural and national contexts Dirk Enzmann, University of Hamburg
17:15	Discussion – issues of context and selection in the testing of SAT
18:00	Bar opens
19:00	Workshop dinner

## **Sunday 5 October**

07:30	Breakfast
09:15	Presentations of questionnaire data, creation of a joint data set, and discussion of issues of comparability
	Chair: Kyle Treiber, University of Cambridge
09:20	UK (Beth Hardie)
09:30	Sweden (Marie Torstensson)
09:40	Germany 1 (Sonja Schulz, André Ernst)
09:50	Germany 2 (Deborah Schepers)
10:00	Netherlands (Frank Weerman)
10:10	Colombia, Ecuador (Alfonso Serrano-Maíllo)
10:20	Slovenia (Gorazd Meško)
10:30	ISRD data (Dirk Enzmann)
10:40	Discussion – issues of cross-national analysis and comparability in testing SAT
11:10	Coffee break
11:30	Discussion of publications and forming an Analytical Criminology Group at the ESC
	<ol> <li>Chair: Kyle Treiber, University of Cambridge</li> <li>Cross-national comparative book</li> <li>Special topics book/special issue of journal</li> <li>Forming an Analytical Criminology group at the ESC</li> </ol>
12:45	Concluding remarks Per-Olof Wikström, University of Cambridge
13:00	Lunch
